## Laundry Products-Liquid

- 8809 Dry** 15 gal drum  
Premium-quality detergent for perc or hydrocarbon solvents for either charge or injection cleaning. Sanitone Dry imparts softness to fabrics.

- 8870 GreenEarth® Charge Detergent** 15 gal drum  
This anionic detergent has excellent soil-suspending properties. Leaves garments with a smooth, soft hand. Can be used as a charge or can be injected with each load.

- 8900 Sonata** 15 gal drum  
Cationic detergent for perc solvent; contains special surfactants and a softener/antistat. Yields easier-to-finish garments with a pleasing hand.

- 8905 Encore** 15 gal drum  
A superior cationic detergent designed and tested for Hydrocarbon, Acetal, D5 Silicone and Propylene Glycol blended solvents. Encore's optimal amount of controlled moisture produces superior cleaning without the risk of causing damage to water sensitive fabrics. Encore is substantive to fabrics and yields easier-to-finish garments. Eliminate your pre-spotting, increase your water soluble stain removal, and make your alternative solvent *sing* with Encore!

- 8912 Summit** 15 gal drum  
Injection detergent for perc solvent; contains anti-static additives for lint control. Outstanding cleaning results with maximum whiteness retention.

- 8916 Performance** 15 gal drum  
A premium injection detergent formulated for both the new modern high-flash, odorless hydrocarbon solvents and traditional petroleum solvents.

## Drycleaning Sizing

- 8850 Style Set Sizing** 15 gal drum  
A special sizing that restores garments to original crispness and improves finishing qualities. Can be used in perchloroethylene or petroleum solvent.

- 8851 Injection Sizing** 15 gal drum  
Sizing for use in 2-bath prewash systems. Imparts a noticeable crispness and body to fabrics making finishing easier. Excellent anti-static properties.

- 8860 Luster Sizing for GreenEarth®** 15 gal drum  
This patented liquid sizing formulated for use in GreenEarth solvent imparts body and enhanced hand to fabrics and enriches colors. Patent #8,507,045

- 8921 Vibe** 15 gal drum  
Multi-enzyme laundry detergent for shirts/regular washables is an all purpose formulation for today's washable fabrics. Vibe is compatible with all common laundry additives.

- 8926 Satin-Soft** 5 gal pail/15 gal drum  
This laundry and wetcleaning softener is a premium biodegradable product that imparts excellent softness and rewetting properties to fabrics.

- 8930 Platinum® Advanced Detergent** 40 lb. pail/160 lb.  
It's Not Just for Shirts! Our multi-enzyme, low pH product restores dull and dingy garments to their original new and bright condition. Proven results on wedding gowns, drapes & curtains, bedding, rugs and casual wear will make your restoration operation the first choice for insurance adjusters and customers.

- 8931 Platinum® EXtra Detergent** 40 lb. pail/160 lb.  
The same great benefits of Platinum Advanced, formulated for areas with hard water or plants without a water softener system.

- 8943 Enhance with Grease Defeat Power** 5 gal pail/15 gal drum  
Grease has a new enemy! Our most versatile product to date, Enhance is a must-have degreasing/emulsifying aid for every part of your plant. Applicable in drycleaning, wetcleaning, laundry, and restoration, Enhance delivers outstanding degreasing, brighter whites, and fewer re-runs due to heavy soil. Save on labor and wow your customers with the cleanest garment possible!

- 8970 Ever-Fresh** 5 gal pail/15 gal drum  
This smoke and odor neutralizer is a unique proprietary product that neutralizes odors and eliminates the need for the ozone treatment of most smoke damaged articles.

- 8930 Platinum® Advanced Detergent** 40 lb. pail/160 lb.  
This formulation includes advanced stain removal, whitening power, and collar cleaning. Platinum Advanced is a concentrated detergent with color-safe bleach for use in professional laundry. Produces superior results while saving water, energy and production time.

- 8931 Platinum® EXtra Detergent** 40 lb. pail/160 lb.  
Our top selling product cleans over 1 million happy shirts a week! The industry's best powder detergent, Platinum Extra, gives shirts brighter colors, superior whites, and a softer feel. Low alkalinity results in longer lasting shirts for your customers and fewer claims for you. Requires a lower temperature and shorter rinses than other powder detergents, saving you on energy and water costs. Brag to your customers that their shirts have just **"gone Platinum!"**

- 8932 Smart Sour** 40 lb. pail  
A highly effective, buffered sour designed for use with Platinum Shirt & Laundry Detergent. Yields a safe pH on shirts having acid-pH-sensitive dyestuff and helps preserve fabric life.

- 8939 Crisp Starch** 35 lb. box  
A premium finishing agent designed to give garments a smooth and pleasing hand. Disperses instantly and penetrates fully leaving no highlights or build-up on fabric when used with Platinum Shirt & Laundry Detergent.

## Wetcleaning Products

- 8944 Elegant Care®** 5 gal pail/15 gal drum  
A low-temperature, no-rinse detergent for today's fine washables such as silk, lingerie, wool, beaded and other delicate garments. Garments have a pleasing hand, enriched and brightened colors, and are easier to finish.

- 8945 Casual Care®** 5 gal pail/15 gal drum  
A versatile, all-purpose detergent specially formulated for washables and casual wear such as khakis, chinos and flannels. Also great for outerwear and bedspreads. Protects garments from fugitive dyes during the wash cycle. Casual Care may be used at any water temperature and is effective on any soil level. It's nearly neutral pH and color transfer inhibitor ensures bright whites and colors. The ideal detergent to match today's modern office look and constantly updating fashion trends.

- 8957 Revitalize** 5 gal pail/15 gal drum  
A fabric finish that minimizes shrinkage, felting and pilling in washable wool, silk, rayon and all-natural fiber blends. Enhances fabric hand and facilitates fabric finishing.

- 8921 Vibe** 15 gal drum  
Multi-Enzyme laundry detergent for shirts/regular washables is an all purpose formulation for today's washable fabrics. Vibe is compatible with all common laundry additives.

- 8926 Satin-Soft** 5 gal pail/15 gal drum  
This laundry and wetcleaning softener is a premium biodegradable product that imparts excellent softness and rewetting properties to fabrics.

- 8933 Accu-Sour** 5 gal pail/15 gal drum  
This liquid buffered laundry sour can be used with all alkaline laundry detergents including Platinum.

- 8937 Sharp** 5 gal pail/15 gal drum  
A unique liquid laundry starch with a starch/polymer blend formulated for shirt and uniform laundries.

- 8942 San-Soft** 5 gal pail/15 gal drum  
This laundry and wetcleaning scent-free softener is a premium biodegradable product that imparts excellent softness and rewetting properties to fabrics.

- 8943 Enhance with Grease Defeat Power** 5 gal pail/15 gal drum  
Grease has a new enemy! Our most versatile product to date, Enhance is a must-have degreasing/emulsifying aid for every part of your plant. Applicable in drycleaning, wetcleaning, laundry, and restoration, Enhance delivers outstanding degreasing, brighter whites, and fewer re-runs due to heavy soil. Save on labor and wow your customers with the cleanest garment possible!

- 8947 Prevail** 15 gallon drum  
Versatile all purpose detergent for today's washable fabrics (casual wear and household fabrics) and does not contain any added fragrances.

- 8956 Fabric Finish** 5 gal pail/15 gal drum  
A conditioner & sizing for shirts, cotton blends and casual wear which minimizes shrinkage, felting and pilling in washable fabrics. Fabric Finish enhances fabric hand and facilitates fabric finishing. Not to be used with "Dryclean Only" garments.

- 8970 Ever-Fresh** 5 gal pail/15 gal drum  
This smoke and odor neutralizer is a unique proprietary product that neutralizes odors in fabrics and eliminates the need for the ozone treatment of most smoke damaged articles. Great for restoration applications.

# PLATINUM POINTERS: Shirt Laundry Trouble Shooting Guide

PLATINUM  
SHIRT & LAUNDRY DETERGENT  
by Sanitone

## Problem Description with Code Solution

### Dirty Collars

Check the following codes...  
1-3-4-5-6-10-11-12

Check the following codes...  
1-2-3-4-5-6-7-8-11-12-13

### Yellowing/browning after pressing

Check the following codes...  
1-3-5-6-7-8-13

### Color loss

Check the following codes...  
2-8-15

### Odor problems

Check the following code... 14

### Stiff shirts after washing

Check the following code... 9

Sanitone.com

## Trouble Shooting Codes

1. Check for proper loading procedures. Loads should not exceed 80% of washer capacity.
2. Check sorting and classification practices. Dark colors and potential "bleeders" must be separated from whites and light colored shirts.
3. Check water levels. **Platinum** should be run at a low level of 6 to 8 inches of water as measured from the bottom of the drum. Rinsing should be at a high level of 12 to 14 in.
4. Check for leaking drain valves. If drains are leaking, detergent will be flushed out with the leaking water and further dilution will occur as the machine continually adds more water in an attempt to reach level.
5. Check water hardness level and be sure the water softener system is working properly.
6. Check water pH. Water pH over 7 and under 6 could cause poor wash results and problems with finishing.
7. Check chlorine levels of the incoming water should not exceed 4ppm. Higher levels can adversely affect the enzymes in **Platinum** and cause fabrics to yellow when finished.
8. Check for proper use of sour. Use only a true buffered sour, such as Sanitone **Accu-Sour**, to achieve a final pH of 6.5. pH below 6 can result in a loss of pinstripes on acid sensitive dyes.
9. Starches containing high levels of Poly Vinyl Acetate will build up on fabric and cannot be removed. Use only Sanitone **Crisp** powdered starch or Sanitone **Sharp** liquid starch.
10. Check water temperatures. **Platinum** should be used at temperatures ranging from 120°F to 140°F.
11. Check washing time. **Platinum** should be used in a single suds formula of 15 to 20 minutes. If nets are used wash time must be increased to 25 minutes.
12. Use 8 oz. of **Platinum** for each 50 lbs of machine capacity (16 oz/100 lbs). For heavy soil applications use up to 32 oz/100 lbs with corresponding increases of a buffered sour.
13. Check for residual iron on the fabric which could cause yellowing and fabric damage.
14. Wet shirts left in the damp box over night may develop an odor if not properly soured.
15. Dark colors should be washed at reduced temperatures.
