DRYCLEANING

BRITE-LIFE® 6709

Premium Charge or Injection Detergent (1 gal., 4x1 gal. case, 5 gal., 15 gal.)

A modern, unique and versatile drycleaning detergent which may be used in hydrocarbon or perchloroethylene solvents.

Some components of this formulation are attracted to the fabric and some remain in the solvent. Because of this, it may be used in an injection system or as a charge.

Brite-Life provides excellent soil removal, superior redeposition control and produces bright whites and colors. It works well with any type of filtration system and provides static and lint control. Garments cleaned in **Brite-Life** have a soft, pleasing hand and are easy to finish.

HYDROCARBON DETERGENT 6710

Premium Charge or Injection Detergent (1 gal., 4x1 gal. case, 5 gal., 15 gal.)

A modern charge or injection detergent formulated with surfactants based on renewable raw materials (80%) for use in all types

of hydrocarbon solvent, including modern high-flash solvents. Provides excellent soil removal and control redeposition.

VIVISIZE 6720

Clear Sizing (5 gal.)

A liquid sizing that will restore garments to their original crispness, improve finishing qualities and improve customer acceptance of your finished product.

WETCLEANING

L.P.S. 6743

Laundry Pre-spotter (1 gal., 4x1 gal. case)

L.P.S. is designed to lift tough ground-in soil and oily stains from washable garments, especially on cuffs and collars. Safe on nearly all fabrics and dyes and will not set stains. Compatible with all detergent systems and can be added with detergent as a booster to remove greasy soil. Mix 50-50 with

Stamford **Spot-Buster** for heavily soiled collars.

WETCLEEN 6744

Detergent for Wetcleaning Fine Washables (1 gal., 4x1 gal. case)

Wetclean is a unique, highly effective, non-alkaline, wet-side detergent for fine washables. It may be used in cold or warm water in standard washing machines, specialty wetcleaning machines, or for hand washing and does not require rinsing. Gentle

enough for the most fragile fabrics leaving them pleasantly soft and easier to finish with their original depth of color.

SPECIALTY

ODEX PLUS 6770

Odor Neutralizer (1 gal., 4x1 gal. case)

Eliminates odor from smoke and many other sources such as perspiration, vomit and pets by chemically reacting with the offending odors.

Odex Plus can eliminate ozone treatment in the restoration process for all but the most severely smoke damaged articles. It can be used in both perchloroethylene and hydrocarbon drycleaning systems, as well as in laundry and wetcleaning systems.

B.F.W.T. 6790

Boiler Feed Water Treatment (1 gal., 4x1 gal. case, 15 gal.)

An effective additive which guards against mineral scale, sludge, acidic corrosion, and dissolved oxygen in process steam boilers.

SPOTTING

Spotters are packaged in 1 gallon containers and 4 x 1 gallon cases. Empty spotting bottles (shown) are available.

TRIK 6735: Tannin Spotter

A safe, effective spotter for tannin stains such as coffee, tea, beer, wine, soft drinks, liquor, fruit juices, grass stains, mustard and other stains derived from plants.

PROTEEN 6736: Protein Spotter

A fast-acting, quick-rinsing wet side spotting chemical for blood, egg, milk, and all other protein stains derived from animals or humans.

P.O.G. 6738: Liquid Paint, Oil and Grease Remover

A fast, effective spot remover for paint, varnish, grease, oil and lipstick. P.O.G. is compatible with all detergent systems and is safe on most fabrics.

SPOT-BUSTER® 6740: Water-White Pre-Spotter

An outstanding pre-spotter, penetrant, and wetting agent. It is mixed with 4 parts water for application by spray or brush or may be used full strength on heavy soil.

SPOL 6742: All Purpose Wet/Dry Spotter

A safe all-purpose spotting product which contains both wet and dry components for use on unidentified stains as well as food, grease, many inks, oil, collar and cuff soil.

S.S.S. 6746: Silk Spotter

A gentle spotting agent specially formulated to remove oily or water soluble stains from fragile fabrics such as silk, rayon, and sheer polyester. S.S.S. may also be used as a leveling agent.

STRIKE 6752: All Solvent Pre-Spotter

A versatile spray spotter that effectively removes soil, perspiration, grease, and other difficult stains in the wheel. Can also be used as a leveling agent.
